

The New Dimension in Soft-Tissue Regeneration

Mucograft - Hands-on Course

Presenters: Prof. Dr. Rino Burkhardt & Dr Vincent Liew

Location: Sydney Eye Hospital

4 CPD hours

Strictly Limited to 20 Participants

Designed for Soft-Tissue Regeneration

Geistlich Mucograft is specifically designed for soft-tissue regeneration. Its 3D-collagen matrix favours early vascularisation, soft-tissue integration and optimal wound healing. Mucograft is the optimal alternative soft-tissue graft for gaining keratinised tissue and root coverage.

The course objective is the treatment of gingival recession defects using coronally advanced flap with a porcine collagen matrix compared to coronally advanced flap with connective tissue graft. Practitioners will have the unique opportunity to “Develop their skills” both theoretical and practical, in the company of Swiss-trained and educated Prof. Dr. Rino Burkhardt, Sydney Periodontist Dr Vincent Liew and Geistlich Biomaterials, the Leaders in Dental Bone and Tissue regeneration.

ABOUT THE SPEAKERS

Prof. Dr. Rino Burkhardt

Prof. Rino Burkhardt graduated from the University of Zurich and received his doctorate from the Medical Faculty of the same University. He is an EFP (European Federation of Periodontology) certified specialist in periodontology and received his Masters degree from the Medical Faculty of the University of Berne (MAS in Periodontology).

Since 1995 he maintains a private practice in Zurich, limited to periodontology and implantology. Additionally he acts as an honorary associate professor at the University of Hong Kong. He published numerous articles and book chapters and got a research prize from the European Federation of Periodontology. He is an active member of the European Academy of Esthetic Dentistry (EAED), the European Association for Osseointegration (EAO), the Swiss Society of Periodontology (SSP) and Board member of the Swiss Society of Implantology (SGI).

Dr Vincent Liew BDS_c(Qld), MDS_c(Perio.)(Qld), FRACDS

Vincent Liew is a graduate in dentistry and periodontics from the University of Queensland. He is currently in private specialist practice in Sydney restricted to periodontics and implant dentistry. He has wide experience in hard and soft tissue grafting, and continues to have interests in regenerative techniques associated with implant surgery as well as general periodontics. Root coverage procedures are a particular interest. He has tutored at undergraduate and postgraduate levels at the University of Sydney, and runs a dental implant study club. He is a fellow of the ITI.
