Surgic Pro2

*T&C's apply. Valid 21- 28 November 2025 4.59PM

Important **Features**

Improved operability thanks to the new, more compact motor and the center of gravity moved closer to the head of the handpiece: more comfort, less stress.

Safe and sensitive display thanks to the easy-clean screen and the smart touch panel, to be adjusted to respond when surgical gloves and surgical barrier sheets are in use.

Superb visibility thanks to the large, back-lit, high-contrast LCD panel. The display can be adjusted with 10 brightness levels and its intuitive icons allow for smooth operation.

High-resolution colour LED light to let you see blood and gums as if naturally-lit and therefore give you increased visibility during treatment, generating a minimal amount of heat.

Silence and smoothness thanks to the irrigation pump, that provides consistent and steady flow while fitting seamlessly in the compact design.

Highest torque accuracy made possible by the optimised torque calibrations system AHC: maximum safety against torque exceeding during implant setting.

Predictability and control to enhance decisions about when to load the implant, especially when a shorter treatment time is given, thanks to the dialogue with Osseo 100+.

Wireless extensibility with multiple devices such as VarioSurg 3 and VarioSurg 4, Osseo 100+, wireless foot control and iPads, to significantly broaden the scope of implant treatments.
