Clinical Case

Dr. Paulo Monteiro

Beautiful anterior smile with 3M™ Filtek™ Easy Match Universal Restorative

About the case

This patient came in to improve the appearance of his smile and presented with failed and failing restorations. Using 3M™ Filtek™ Easy Match Universal Restorative, a beautiful, harmonious smile was restored using only one shade.

Dental restorative used:
3M™ Filtek™ Easy Match Universal Restorative, Natural shade.

About Dr. Paulo Monteiro

In 2005 Paulo completed his specialisation in Aesthetic and Restorative Dentistry at the ISCSEM, Lisbon, Portugal. In 2010 he finished a Master's degree in Dental Medicine and is currently working towards a PhD in Dentistry at Universidade de Santiago de Compostela, Spain. He has taken the International Professional Course of CAD/CAM technology in Restorative Dentistry at the University of Zurich in 2008. Presently, he is an Assistant Professor at ISCSEM, for the Aesthetic and Restorative Dentistry Post-graduation program and for the Oral Rehabilitation Department at ISCSEM. In parallel, he is the head of Clinical Aesthetic Dentistry advanced consultation at ISCSEM, the head of Operative Dentistry Technology Training Course for Dental Assistants and the head of Intra-Oral Photography Technology Training Course for Dental Assistants in Egas Moniz, Lisbon, Portugal. He is also involved researching new dental materials, including composite resins, dental adhesives, dental ceramics and new technologies. He is an active member of the International Association for Dental Research, and regularly presents research in the dental materials field. He is author and co-author of multiple publications in scientific international journals and gives lectures in national and international courses and congresses in aesthetic dentistry. In his private practice, he devotes himself exclusively to aesthetic dentistry.

1 Initial situation

2 Using a custom shade guide, shade was matched to Natural, before placing a rubber dam

3 Restorations were removed, and bevels were placed in the enamel. The Class III preparations involve the buccal aspect

4 Adjacent teeth are protected with PTFE tape, and the teeth are etched with phosphoric acid etch

5 3M[™] Scotchbond[™] Universal Plus Adhesive is applied for 20 seconds with a microbrush, then air dried and cured

6 Using mylar strips, 3M[™] Filtek[™] Easy Match Universal Restorative, Natural shade is placed in the preparations, and cured in 2 mm increments

7 Final result before finishing and polishing

8 3M[™] Sof-Lex[™] XT Discs are used to finish the restorations, removing gross excess and defining embrasures and line angles

9 A high-gloss finish is achieved using 3M[™] Sof-Lex[™] Diamond Polishing Spirals

10 Natural looking, final result

Clear and simple.

3M™ Clinpro™ Clear Fluoride Treatment

The days of explaining the uncomfortable, gritty look and feel a fluoride varnish leaves on your patients' teeth are over. New Clinpro Clear Fluoride Treatment delivers what you've been asking for: teeth that feel clean and smooth, and effective fluoride uptake at a lower dosage.

3M™ Clinpro™ Clear, 2025 Top Award Winner. Dental Advisor Vol. 42 2025, Awards Issue.
